AMARJEET KUMAR VERMA

Senior QA Engineer | Test Automation | API, Web, Mobile & AI Application Testing

vermaamarjeetkumar0@gmail.com | +91 7739375326 | linkedin.com/in/amarjeet-kumar-verma-363830219 | github.com/AmarjeetAkv | amarjeetakv.github.io | India

PROFESSIONAL SUMMARY

Senior QA Engineer with 8+ years of experience assuring the quality of API, web, mobile, and AI-driven applications. Specialises in Python test automation with Behave (BDD), Playwright, Selenium, and Appium, and has deep hands-on experience in decentralised identity: ACA-Py, AnonCreds, JSON-LD, and W3C verifiable-credential issuer, holder, and verifier workflows. Builds CI-integrated test suites on GitHub Actions and Jenkins with Allure and Confluence reporting, and contributes to OWL Akrida, an open-source Locust-based framework for load testing ACA-Py and DIDComm agents. Trusted to own quality across several parallel projects in Agile teams.

TECHNICAL SKILLS

Automation & Languages: Python, Behave (BDD), Playwright, Selenium WebDriver, Appium, Java (working knowledge)

API & Platform Testing: REST APIs, JSON, end-to-end API workflow validation, ACA-Py agents, wallet operations, Postman, Swagger (OpenAPI), socket testing (manual and automated)

Performance & Load Testing: Locust, OWL Akrida, Credo-TS, concurrent DIDComm agent simulation

Decentralised Identity: AnonCreds, JSON-LD, W3C Verifiable Credentials, DID Exchange, issuer / holder / verifier flows, Trust Registry

AI Application Testing: Chatbot response validation, hallucination, out-of-scope, negative, and privacy testing

CI/CD & Reporting: GitHub Actions, Jenkins, AWS EC2, Allure, Confluence, Git, GitHub

Testing Types: Functional, integration, regression, smoke, end-to-end, exploratory, negative, UI, mobile, API, load

Tools & Process: Jira, Zephyr, Agile / Scrum, test planning and design, defect management, test data management

PROFESSIONAL EXPERIENCE

Northern Block Inc. — Senior QA Engineer
Mar 2023 – Oct 2026

- Owned test design, automation, and execution for API, web, and mobile applications across multiple projects running in parallel.
- Built and maintained Python automation frameworks using Behave with Playwright and Selenium for UI and REST API coverage.
- Validated end-to-end user journeys, API behaviour, data handling, and negative scenarios; triaged failures and drove defects to resolution.
- Integrated automated suites into GitHub Actions and Jenkins pipelines and published Allure and Confluence reports for team-wide visibility.
- Partnered with engineering and product teams in Agile sprints to expand test coverage and raise release confidence.

QSS Technosoft Pvt. Ltd. — Senior QA Engineer
Oct 2021 – Mar 2023

Perigon Technologies Pvt. Ltd. — QA Engineer
Mar 2018 – Sep 2021

OPEN-SOURCE CONTRIBUTION

OWL Akrida — Load-Testing Framework for ACA-Py Agents
Nov 2022 – Present

OpenWallet Foundation (formerly Hyperledger Aries Akrida) | Python, Locust, Credo-TS, Node.js, Git, Jenkins

- **Active community member:** Active member of the OWL Akrida repository, a framework that simulates concurrent holder agents to load test ACA-Py issuer, verifier, and mediator agents over DIDComm.
- **Load-test scenarios:** Developed Locust test cases for core ACA-Py agent flows (connection invitations, credential exchanges, and proof requests), so issuer and verifier agents can be stress tested under concurrent load.
- **Observability:** Improved logging and debugging output so failures under load can be traced and diagnosed faster.
- **PR #76, Framework migration (merged Nov 2024):** Migrated the load agent from Aries Framework JavaScript to Credo-TS, refactoring for breaking changes and updating the Indy VDR network configuration. github.com/openwallet-foundation/owl-akrida/pull/76
- **PR #84, ACA-Py 1.0 & AIP 2.0 support (closed, not merged; further updates requested):** Upgraded ACA-Py to 1.0.0, added the DID Exchange 1.1 connection protocol, added Issue Credential and Present Proof flows under AIP 2.0, and documented the askar-anoncreds wallet type. github.com/openwallet-foundation/owl-akrida/pull/84

KEY PROJECTS

EAPI Automation — Northern Block Enterprise API Platform
Mar 2023 – Oct 2026

Python, Behave, REST APIs, ACA-Py, GitHub Actions, Allure, Confluence

End-to-end API automation for Northern Block's Enterprise API (EAPI), built on ACA-Py and credential-based identity workflows.

- Built and maintained Behave scenarios covering issuer, holder, and verifier Line-of-Business (LOB) workflows.
- Validated the full credential lifecycle (creation, issuance, wallet storage, and verification) for AnonCreds and JSON-LD formats.
- Covered Cloud-to-Mobile flows with the BC mobile wallet as holder, as well as Cloud-to-Cloud holder workflows.
- Scheduled suite execution in GitHub Actions with daily automated result publishing to Confluence alongside Allure reports.

Cornerstone Wealth — AI Property & Credential Platform
Nov 2025 – Oct 2026

Python, Behave, Playwright, Allure

Digital credential platform for the Canadian real-estate market connecting homeowners, real-estate professionals, trust-network members, and partners, with an AI assistant for property and portfolio questions.

- Automated role-based web journeys, including login, onboarding, network-partner administration, and portfolio-issuer invitation flows.
- Tested the AI assistant across property valuation, equity, mortgage, property tax, cost of ownership, insurance, and market queries.
- Designed positive, negative, out-of-scope, privacy, and hallucination-focused test suites, including checks for unavailable or unverified property facts.
- Automated chat interaction and response validation with Behave and Playwright, and reported results through Allure.

Trust Registry Automation
Mar 2025 – Jan 2026

Python, Behave, Selenium

- Developed and executed Behave and Selenium automation for Trust Registry UI workflows.
- Validated UI behaviour across user flows, investigated failures, and supported defect reporting.

ACA-Py Wallet API Automation
Aug 2023 – Aug 2025

Python, Behave, REST APIs, Jenkins, Zephyr, AWS EC2

- Automated REST API scenarios for credential issuance, proof requests, DID Exchange, and wallet operations.
- Deployed automation to AWS EC2 and maintained Jenkins execution pipelines; managed test cases and results in Zephyr.

NB Enterprise UI & Orbit Edge Wallet
Mar 2023 – Nov 2025

Python, Selenium, Appium, Jenkins, Zephyr, AWS EC2

- Automated functional, regression, and UI scenarios for enterprise and mobile credential applications on Android and iOS.
- Worked with the OWL AATH and AMTH interoperability test harnesses and integrated test management through Zephyr.

EARLIER PROJECT EXPERIENCE

- **elBurst (E-commerce & Project Management), Oct 2021 – Jun 2022:** Automated web and mobile scenarios with Python, Selenium, and Appium; supported functional and GUI testing, test planning, and Jira defect reporting.
- **Cargill CRM, May 2020 – Aug 2021:** Wrote and executed Java/Selenium automation scripts, maintained test data, performed functional and GUI testing, and reported defects in Jira.
- **Libra (Sales Management), Jun 2018 – Apr 2020:** Executed smoke, functional, integration, system, ad-hoc, and regression testing; maintained test data and logged defects in Jira.
- **Animaker (Video Editing):** Performed manual functional testing and supported test execution and defect tracking in an Agile team.

EDUCATION

B.Tech, Electrical Engineering — Biju Patnaik University of Technology (BPUT)
2014

CGPA: 7.1

Class XII (CBSE), 2009: 70.1% **Class X (ICSE), 2007:** 92.2%
